

Piyush Raj

Software Engineer | AI & Real-time Systems

(+91) 9896444654 | piyushhraj98@gmail.com | [portfolio](#) | [linkedin.com/in/piyush-raj-4469671a7](https://www.linkedin.com/in/piyush-raj-4469671a7) | github.com/rajpiyush4

EXPERIENCE

Software Engineer | Global FPO, Delhi, India (2025–Present)

- Architected AI-powered accounting workflows, leveraging LLM integration to streamline bookkeeping processes.
- Designed a scalable AI-assisted bank categorization engine, implementing structured outputs to automate transaction naming and classification.
- Engineered core modules for Bank Register, List, and Reconciliation, prioritizing state consistency and low-latency data rendering.
- Built robust data ingestion pipelines for migrating financial records from legacy platforms, ensuring data integrity across complex schema mappings.

Associate Software Engineer | Mind IT Systems, Delhi, India (2024–2025)

- Engineered interactive reporting modules, optimizing data accessibility for end-users.
- Designed a flexible data export engine, reducing engineering overhead by enabling dynamic schema selection.
- Integrated international top-up services, managing complex transaction states and API error handling for seamless cross-border payments.
- Optimized real-time notification systems using Socket.io to enhance event-driven collaboration.

PROJECTS

Voxa | Next.js, TypeScript, Real-time Voice AI, LLM Orchestration, Zustand | [Code](#) | [Demo](#)

- Architected a real-time voice AI assistant leveraging modular pipelines for low-latency Speech-to-Text and Text-to-Speech interactions.
- Implemented advanced AI orchestration with dynamic tool calling, enabling seamless integration of external services within conversational flows.
- Designed a scalable, event-driven architecture using custom hooks and centralized state management to handle streaming AI responses.
- Optimized voice interaction performance, reducing latency through efficient model selection and stream-based data handling.

Gratify | Next.js, TypeScript, MongoDB | [Code](#)

- Developed a mindfulness journaling app featuring streak tracking and accessibility through text and voice input support.

SKILLS

Languages: TypeScript, JavaScript, C++, Python

Frontend: React, Next.js, Tailwind CSS, Zustand, Framer Motion

Backend: Node.js, Express, REST APIs, GraphQL

Databases: MongoDB, Prisma/PostgreSQL

AI Engineering: Voice AI, LLM Orchestration, Real-time Streaming, Tool Calling, Structured Outputs, Prompt Engineering, AI SDK Integration

Tools: Git, GitHub, Postman, Agile/Scrum

EDUCATION

J.C. Bose University, YMCA | B.Tech in IT (2020-2024) | CGPA: 7.89
